

A quick and cost-efficient way to measure your 2016 DIWALI CAMPAIGN!

An Environics Syndicated Study Prospectus

Our 2016 Diwali Syndicated Study is a quick and cost-effective way to measure your 2016 Diwali Campaign. The study is a shared vehicle, but will provide you with your own proprietary effectiveness measures.

You can choose from one of the following two options:

OPTION 1: Overall campaign awareness by media, positive response and relevance of the campaign

200 first generation South Asian Canadians

TENURE	GTA	GVA	TOTAL
0-10 yrs	50	50	100
11 + yrs	50	50	100
Total	100	100	200

OPTION 2: Overall campaign awareness by media, positive response and relevance of the campaign + brand impact and campaign persuasion

NEW Larger sample size allows for deeper diagnostics on campaign effectiveness among those aware, including brand impact and campaign persuasion.

400 first generation South Asian Canadians

TENURE	GTA	GVA	TOTAL
0-10 yrs	100	100	200
11 + yrs	100	100	200
Total	200	200	400

In addition to your own proprietary package, you will also have access to the following syndicated information on the 2016 Diwali:

- Unaided recall of Diwali advertising campaigns
- Special shopping behaviour (stores visited for Diwali shopping, flyers and categories prompting the trips)
- Special events attended
- Media consumed

All results reported by region and tenure in Canada

Methodology

Online survey (so that your campaign can be embedded)
